The theory of human motivation (Maslow, 1943), better known as Maslow's hierarchy of needs, is considered a cornerstone of understanding human motivation. Even today it continues to be used as a foundation for other theories of motivation and behavior. The theory of human motivation asserts that we each have a set of basic needs that must be met, including biological and psychological, safety, belongingness and love, self-esteem, and self-actualization.

Motivation theory should be human-centered rather than animal-centered. 11. The situation or the field in which the organism reacts must be taken into account but the field alone can rarely serve as an exclusive explanation for behavior. Furthermore the field itself must be interpreted in terms of the organism.
