While modern books are born digital, books old enough to be in the public domain may never have seen a computer. Google has been scanning books from public libraries and other sources for several years. That means you've got access to an entire library of classic literature that you can read on the computer or on a variety of

Updated resuscitation guidelines refine how fast and how deep chest compressions should be during CPR – although it's unlikely that a non-professional rescuer will notice. The new rate of chest compressions is 100 to 120 compressions, or pushes, per minute, compared to “at least 100” in previous guidelines, according
