change by which
people originated from
apelike ancestors.

Scientific evidence
shows that the physical
and behavioral traits
shared by all people
originated from apelike
ancestors and evolved
over a period of
approximately six
million years. One of
the earliest defining
human traits,
bipedalism -- the ability
to walk on two legs --
evolved over 4 million

process of change in all forms of life over generations, and evolutionary biology is the study of how evolution occurs. Biological populations evolve through genetic changes that correspond to changes in the organisms ' observable traits.

Introduction to evolution - Wikipedia

The central ideas of

Download Ebook An Introduction

To Human Evolutionary Anatomy

evolution are that life has a history — it has changed over time — and that different species share common ancestors. Here, you can explore how evolutionary change and evolutionary relationships are represented in "family trees," how these trees are constructed, and how this knowledge affects biological classification.
