The mean score for all test takers from July, 2009, to July, 2012, was 526 with a standard deviation of 95. After learning that test content from editions of the GRE® Biochemistry, Cell and Molecular Biology (BCM) Test has been compromised in Israel, ETS made the decision not to administer this test worldwide in 2016-17.

The Cytoskeleton then may be a hard-wired molecular system that stabilizes cell form & shape, according to the architectural principles of tensegrity. Biological Tensegrity suggests: That the structure of cell's cytoskeleton can be changed by altering the balance of physical forces transmitted across the cell's surfaces and this might result in
