### Delilahs Hysteria A Victorian Doctor

In the Victorian Era - specifically 1837 to 1901 - doctors treated woman by genital stimulation to induce "hysterical paroxysm" or an orgasm. This hysteria was supposed to be a build-up of fluid in the woman's womb and doctors assumed that since men ejaculated and felt better then it stood to reason.

### Female Hysteria: When Victorian Doctors Used to Finger ...

Hysteria is widely discussed in the medical literature of the Victorian era. In 1859, a physician claimed that a quarter of all women suffered from hysteria. He cataloged possible symptoms, which included faintness, nervousness, insomnia, fluid retention, heaviness in abdomen, muscle spasm, shortness of breath, irritability, loss of appetite for food or sex, and "a tendency to cause trouble.

### Female Hysteria during Victorian Era: Its Symptoms ...

Many of us have heard the story that Victorian-era doctors first used vibrators, applying them to their female patients to treat them for hysteria. But it turns out this may be a myth.

### The vibrator: from medical tool to revolutionary sex toy ...

The Victorian era saw a wide variety of cures and treatments for hysteria, some of which were extremely bizarre. As mentioned in earlier posts, the Victorian era still mainly associated hysteria with women, and therefore most forms of treatment related to them, and not men. One such treatment is that of the "gentle massage." The...

### Treatments for Hysteria - The Victorian Secret

Text via Victorian Era. Female hysteria was once a common medical diagnosis, made exclusively in women. The history of the notion of hysteria can be traced to ancient times. Galen, a prominent physician from the second century, wrote that hysteria was a disease caused by deprivation in particularly passionate women: hysteria was quite often in virgins, nuns, widows and, rarely, in married women.
