Android 11 updates how media controls are displayed, making use of the MediaSession and MediaRouter2 APIs to render controls and audio output information. Media controls in Android 11 are located near the Quick Settings. Sessions from multiple apps are arranged in a swipeable carousel.

Media Controls | Android Developers
If the device is running Android 5.1 (API level 22) or lower, or the app's targetSdkVersion is 22 or lower, the system asks the user to grant the permissions at install time. Once again, the system just tells the user what permission groups the app needs, not the individual permissions. For example, when an app requests READ_CONTACTS the install dialog lists the Contacts group.
