E60 cars with normally aspirated NG6 (new generation) N51 engines are equipped with a standard non-variable intake manifold. These engines have the same displacement as the N52 engines, but are designed with stricter emission standards in mind.

BMW E60 5-Series N52 Engine Intake Manifold Upgrade ...

History, Power & Specs of the N52 Engine. There were 2 versions, the N52B25, and N52B30. The differences between these engines are the N52B25 has a smaller bore and stroke, so pistons, crank etc are different, but they share the same block and head. The N52 was a straight 6 NASP engine and won a Wards best engine award in 2007 and 2006. It also ...

Our favorite engine management option is the BMS Power Box tuner for BMW N52 128i, 328i & 528i models. Good for 8-10whp / 8-10wtq on its own, the Power Box is a plug-n-play tuner that does not rewrite your ECM, thereby leaving no trace on the ECU if you remove it later on - this device remaps the throttle and other ECM settings to get the car to peak performance.

Get 70hp with 5 Best Power Mods for BMW 328i 128i + 528i

The N53 replaced the N52 in most markets, except for notably the North American Market and Australia. These markets were excluded due to high sulfur content in the fuel. BMW was able to reduce fuel consumption in the N53 engine by adding direct injection and a nitrogen oxide storage catalytic converter.
