Frustration And Aggression

Frustration-aggression hypothesis, otherwise known as the frustration-aggression-displacement theory, is a theory of aggression proposed by John Dollard, Neal Miller, Leonard Doob, Orval Mowrer, and Robert Sears in 1939, and further developed by Neal Miller in 1941 and Leonard Berkowitz in 1969. The theory says that aggression is the result of blocking, or frustrating, a person's efforts ...

Frustration-aggression hypothesis - Wikipedia

This suggests that aggression is a consequence of frustration. Frustration always creates a need to respond, and aggression can be one of its outcomes. It implies that frustration may or may not result in aggression, but aggression is possibly a result of frustration. Frustration is not sufficient but rather a necessary condition for aggression.
