Step 1 - Create LED Blink Circuit. To begin, you will need to connect the power bit (1) to the Arduino bit (2) at the point marked (a- zero). Make sure the 9v battery (3) is attached to the power bit using the power cable. Next, attach the LED bit (4) to the side marked (d5~) and then TURN ON the power bit.

## **Getting Started With Arduino Using littleBits Coding Kit**

LittleBit electronics provide the perfect overlay tools to teach simultaneous subjects such as biology, math, physics, electronics, music, art, and more through prototyping solutions. For example, day-two lessons used electronics to prototype and simulate biology and environmental concepts.
