After devouring The Time Bubble in one day, I couldn't wait to start on the follow up, Global Cooling. What followed was another great read about a time set in the not-too-distant future when an asteroid unexpectedly hits earth and the devastating consequences of that plunging Britain and Europe into what becomes known as the "Black Winter".

The Time Bubble certainly kept me turning the pages, although I didn't find it as intriguing as My Tomorrow, Your Yesterday. But at the end of the story, it made me ponder on the implications of time doubling up every time a person passed through the time bubble.

### **The Time Bubble (The Time Bubble #1) by Jason Ayres**

This dataset was not available at the time. Global cooling was a conjecture, especially during the 1970s, of imminent cooling of the Earth culminating in a period of extensive glaciation, due to the cooling effects of aerosols and orbital forcing.
