Gm Turbo 350 Transmissions How

The Turbo 350 transmission was introduced beginning in 1969. This transmission was a 3 speed automatic transmission developed jointly by Chevrolet and Buick.Although they were both under the General Motors umbrella, at the time they acted as completely separate entities, whereas now the developers at General Motors powertrain work only for GM, not Chevrolet or Buick.

Turbo 350 Transmission (TH350): Specs and Parts Guide

Although not quite the heavy-duty performer as its big brother, the Turbo 400, the Turbo 350 transmission is a fine, durable, capable, and when modified, stout performer in its own right. Millions of GM cars and trucks have been built with Turbo 350 automatic transmissions. There always comes a time when the old transmission shows signs of wear.

GM Turbo 350 Transmissions: How to Rebuild and Modify

The HydraMatic 350 transmission was prevalent in nearly all GM, rear-wheel-drive cars and trucks through 1984. It was typically paired with Small Block V6 & V8 engines. It was phased out of use and superceded by GM's 700R4 starting in 1982. The Turbo 350 is the shortest and one of the strongest automatics that can be put into a Jeep. Identification

The Novak Guide to the GM TH350 Automatic Transmission

The Turbo 350 got plenty of exposure in rear-wheel vehicles - both cars and trucks - designed by GM, at least until 1984. It works best with V6 and V8 small block engines but was gradually phased out and replaced by the 700R4 from 1982 to 1984, after which point the Turbo 350 was no longer produced.

GM Turbo 350 (TH350) Transmissions: Specs
