### Keratolytics And Emollients And Their

Psoriasis is a common chronic disease with significant impairment in quality of life. As there is no cure, it often requires lifelong disease control to minimize the development of skin lesions and to relieve symptoms. The aim of this publication is to systematically review the role of currently used emollients and keratolytics in the treatment of psoriasis.

### Keratolytics and Emollients and Their Role in the Therapy ...

Emollients are substances that soften and moisturize the skin and decrease itching and flaking. Emollients/moisturizers work by forming an oily layer on the top of the skin that traps water in the skin. Petrolatum, lanolin, mineral oil, and dimethicone are common emollients. Lactic acid, salicylic acid, and urea are keratolytics.
