for example A4, A3, A2, A1, A0, and so on.

Scale drawing - Designing Buildings Wiki

The 20 scale is used for scales such as 1 inch = 2 feet, 1 inch = 20 feet and 1 inch = 200 feet. Whether you are using a 10 scale, 20 scale or 50 scale, the values increase by multiples of 10. So, for example, a 50 scale drawing could use a scale of 1 inch = 5 feet, 1 inch = 50 feet, 1 inch = 500 feet.

Scales Used in Technical Drawings | Sciencing

BSI, the British standards company, has revised BS 8888:2017 –Technical product documentation and specification. The latest version is a comprehensive update to the UK's national framework standard for engineering drawings and geometrical tolerancing. BS 8888 defines the requirements for the technical specification of products and their component parts.

UK's national standard for engineering drawings revised | BSI

design solution used in preparing other engineering drawings. Applications. A layout drawing may be prepared for a complete end product or any portion thereof and is prepared either as, a) A conceptual design layout to present one or more solution for meeting the basic design parameters and to provide a basis for

Fundamentals Engineering Drawing Practices

Production drawings (sometimes called working drawings) are complete sets of drawings that detail the manufacturing and assembly of products (as distinct from engineering drawings prepared by and/or for production engineers whose task is to decide how best to manufacture the products).. Machine operators, production line workers and supervisors all use production drawings.
