Product Sheets & User Manuals - Eno Scientific

The easiest way to check your static (resting) water level is to tie a small weight (such as a metal nut) to a string, and lower it into the well. First, flip off the electric breaker, and remove the well cap, which is usually held by 3 bolts. For the most accurate reading, turn off the pump for at least two hours before checking the level.

How To Measure Your Well and Static Water Level - Well ...

I just hooked up a EZ well water pump in my well today. My well is 250 ft deep with a water level of about 40ft below ground. I put the pump in at about 80 ft deep. It is all PVC except the foot valve. It took us about 60 mins to install and start pumping water. The 100ft pump kit cost me just \$169 including shipping!!! Reply
