Speed Reducers. Right angle bevel speed reducers decrease speed and increase torque from the driver end to the driven end in a drive system. They have a beveled gear that allows the reducer to rotate in both directions and operate with low noise and vibration. They are typically made out of durable, corrosion-resistant materials like stainless ...

Gear reducer maintenance The correct amount of oil must be maintained in a gear reducer to ensure long and satisfactory performance. If the reducer operates with an insufficient amount of oil, premature gear or bearing failure can occur due to oil starvation. Over-filling the reducer, however, will create excessive churning that leads to ...
