Taxicab Geometry An Adventure in Non-Euclidean Geometry ...

A taxicab geometry is a form of geometry in which the usual distance function or metric of Euclidean geometry is replaced by a new metric in which the distance between two points is the sum of the absolute differences of their Cartesian coordinates. The taxicab metric is also known as rectilinear distance, L1 distance, L1 distance or

Taxicab geometry - Wikipedia

Taxicab geometry was proposed as a metric long before it was labeled Taxicab. A Russian by the name of Hermann Minkowski wrote and published an entire work of various metrics including what is now known as the taxicab metric. In 1952 an exhibit was displayed at the Museum of Science and Industry of Chicago, which highlighted geometry.
