Amazon.com: The Singapore Water Story: Sustainable ...

Water from local catchment is a pillar of our sustainable water supply. Since 2011, the water catchment area has increased from half to two-thirds of Singapore's land surface with the completion of the Marina, Punggol and Serangoon Reservoir.

PUB Singapore Water Story

This book describes the journey of Singapore's development and the fundamental role that water has had in shaping it. What makes this case so unique is that the quest for self-sufficiency in terms of water availability in a fast-changing urban context has been crucial to the way development policies and agendas have been planned throughout the years.

The Singapore Water Story | Sustainable Development in an ...

The Singapore Water Story: Sustainable Development in an Urban City-State Cecilia Tortajada, Yugal Kishore Joshi and Asit K. Biswas Routledge, London, 2013, 286 pages. When Singapore became independent from Malaysia in 1965, water presented a curious paradox. On the global water index, it was one of the wettest -yet driest- countries in the world.

The Singapore Water Story: Sustainable Development in an Urban City-State Cecilia Tortajada, Yugal Kishore Joshi, Asit K. Biswas Routledge, London, 2013, 288 pages When Singapore, smaller than New York City, broke away from Malaysia in 1965, its single biggest strategic vulnerability was water.

Book Review: The Singapore Water Story: Sustainable ...

Over the decades, PUB, Singapore's national water agency, has created a sustainable supply from four sources: water from local catchment, imported water, high-grade reclaimed water (known as NEWater) and desalinated water. Together, these four sources, termed the "Four National Taps", have come a long way in helping Singapore meet its water needs.

Four Taps: The Story of Singapore Water - BiblioAsia

Sustainable water management has high priority for the Singaporean government and the treatment of processed and waste water (NEWater) as well as the treatment of drinking water from seawater are the main topics. Sustainable water management is of enormous importance for Singapore's future.
